

Template for Recall Initiation Schedule

Guidance notes:

This template is for a Supplier to use for preparing a Recall Initiation Schedule pursuant to the Consumer Goods (Motor Vehicles With Affected Takata Airbag Inflators and Specified Spare Parts) Recall Notice 2018 (the Recall Notice). The sample text in this template is for illustration purposes. The template is designed to allow a Supplier flexibility in scheduling recall initiation in accordance with the provisions of the Recall Notice.

- Geographic application – this allows Suppliers to prioritise based on climatic conditions. Suppliers may prioritise by state or territory, or postcode, or some other clear demarcation that consumers can easily understand.
- VIN list – This allows Suppliers to provide a searchable VIN list as part of this Schedule or by link, should a Supplier wish to do so. A Supplier may wish to specify certain VINs from a specified model list based on a priority factor (such as climate). In any event, a Recall Database must be established by no later than 1 July 2018, which will allow a consumer to search by VIN and identify the recall status of their vehicle.
- Other factors – this field allows Suppliers to prioritise by other factors under the Recall Notice, as needed.

Once completed, the schedule should be dated and labelled with a version number as follows:
